Group on-mine US$ cash costs increased 17% due to:

- Inclusion of Kimberley Ekapa Mining JV for the full Year (4% increase)
- Inflationary increases, including the impact of electricity and labour costs (7% increase)
- The effect of translating South African operations’ ZAR denominated costs at a stronger ZAR/USD exchange rate (6% increase)

Diamond Market – Overview

Supply

• **Supply constraints**: Global rough diamond production rose 6% to 134 Mcts worth $12.4bn in 2015 (average $92/ct)
• **No new finds**: success rate in diamond exploration estimated to be <1% - no significant finds this century
• **Overall declining trend**: 2005 expected to have been world peak diamond production
• ‘New’ mines that came on stream in 2016/2017 not large enough to counter declines from world’s major producers
• Several mines/development projects recently closed
• World supply expected to decline slowly after 2020

Demand

• **Global market**: rose 0.3% to record high of $80bn in 2016
• **US recovery**: economy continues to improve; very strong diamond buying culture (ca. 47% of world demand)
• **“Late cycle” commodity**: growth in developed and emerging markets to continue further to rising wealth and growing middle classes worldwide
• **Bridal underpin**: The bridal sector provides a certain level of immunity to fluctuating economic conditions; desire for diamond bridal jewellery increasingly taking hold in emerging markets
• **Mass luxury**: China / India starting to follow US model of affordable diamond jewellery ($200 to + $2,000)

**Diamond Prices**

**FY 2017 Market**
- Stable rough market – Petra achieved flat pricing in H1 and pricing up ca. 2% in H2
- Steady demand experienced across all diamond size ranges, apart from the few months immediately following Indian demonetisation (impacted small, low value goods)
- Release of significant inventory of smaller goods by majors in H2 FY 2017

**FY 2018 Outlook**
- Market assessed to be stable; mixed results from US retailers, improving retail market in China and India; rebound in luxury goods including Swiss watches
- Petra guiding for flat diamond pricing for FY 2018, but improved product mix expected for Finsch, Cullinan and Koffiefontein (less tailings contribution and ever-increasing volumes of ore from undiluted areas)
- First tender of FY 2018 saw seasonal softness, with pricing on a like for like basis down ca. 3% in comparison with H2 FY 2017

1. Excludes guidance for exceptional diamonds (stones above $5 million in value), which added ca. $21.7 million per annum since FY 2009
2. Average values excluding exceptional stones: Cullinan FY17: $113/ct; Cullinan FY16: $109/ct; Williamson FY17: $235/ct; Williamson FY16: $238/ct
3. KEM JV FY17 below expectations due to higher contribution of tailings than planned; KEM JV FY16 reflects dilutive impact of combining tailings and ROM sales from H2 FY 2016 onwards
DPA ramps up Generic Marketing

Diamond Producers Association seeks to actively influence sustainable consumer demand by:

• Promoting the integrity of the diamond industry and maintaining consumer confidence
• Providing generic marketing support, ensuring diamonds remain relevant to the next generation of consumers

DPA budget increases x4 to $57 million in 2017

• $50 million assigned to major US market – mostly will be spent in H2 calendar 2017
• Comprises multi-channel advertising, innovative digital programmes, high-impact PR around the ‘Real is Rare. Real is a Diamond’ campaign
• Marketing launch in India in October 2017
• Marketing launch in China in April 2018
• Industry advocacy and trade programmes to support the pipeline, plus challenging misleading synthetics industry narrative and language
Ramp up of Undiluted Ore

- Caving is a safe and proven mechanised mining method; provides access to higher volumes of ore than other methods
- Transition from diluted, mature caves nearing end of lives to new block/sub level caves in undiluted kimberlite well underway
- ROM grades already increasing significantly further to rising input of undiluted ore:
  - **Finsch ROM grade +54%:**
    - From 36.8 cph in FY 2012 to 56.6 cph in FY 2017
  - **Cullinan ROM grade +48%:**
    - From 24.4 cph in FY 2015 to 36.1 cph in FY 2017
    - Expected to increase further 38% to 49 – 51 cph¹ by FY 2019

¹ Management expectations
Transformation Underway

- Replacement of poorer quality tonnes with better quality tonnes will significantly grow production and margins due to less waste dilution, higher grades and improved product mix.

2. Capex, production, adj. operating cashflow and revenue relating to KEM JV stated at 75.9% Petra attributable terms; production forecasts include Williamson in normal operation.

Petra has acquired six non-core diamond mining operations from De Beers

**Petra approach:**

- Flat management structures
- Focus on efficiencies / cost control
- Focus on value as opposed to volume production
- Utilise in-house expertise / knowledge
- Phased approach to development (lower capital intensity)
- Make decisions, get going
